1. We have not identified alternate sources of financing the 'Objects of the Issue'. If we fail to mobilize the resources as per our plans, our growth plans may be affected.

We have partly funded some of the proposed projects, including the purchase of non-agricultural land for both our proposed projects at Gandhidham and Surat for an amount of Rs. 258.32 Lacs, mentioned in the Chapter "Objects of the Issue" on page number 78 through internal accruals. We have not identified any alternate source of funding the balance requirement, and replenishing our reserve. Therefore, any failure or delay on our part to mobilize the required resources or any shortfall in the issue proceeds may delay the

implementation schedule of our expansion projects and could adversely affect our growth plans.

- 2. There is no independent monitoring agency appointed by our Company, the deployment of Funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.**

If we are unable to obtain the requisite licenses in a timely manner or at all, our business operations and results may be affected. Further, we are also in the process of making applications for certain permits and approvals, as may be required, for our vast expanse of business to run as a going concern.

Our Company, pending use of the net proceeds of the Issue, intends to invest the funds in high quality, interest and dividend bearing liquid instruments including money market mutual funds and inter-corporate deposits with banks which might not yield a return as high as our business. 5. The Gandhidham unit enjoys exemption from the payment of excise duty on its products only till April 4, 2009. After this period the said products might attract excise duty (currently excise duty is 0%) , which might effect the net realisations on these products.

The Company is currently enjoying excise duty exemption on the goods manufactured at the Company's plant in Gandhidham. This excise duty exemption will expire on April 4, 2009 which may result in increased tax outflow affecting the company's profitability.

6. We have not yet fully recruited manpower for our proposed projects. Any delay in recruiting or finding suitable manpower might hamper implementation of the project.

We require a total of 106 employees for both our proposed projects. As on the date of the Prospectus, we have already commenced the recruitment process for the required manpower.

We filed an application for registering "Gokul" (English) as our Trade Mark on October 22, 1993. However, the application is still pending with the Registrar of Trade Marks because of objection filed by M/s. Kolhapur Zilla Sahakari Dudh Utpadak Sangh Ltd. as they are the registered proprietors of the trademark "Gokul" in respect of milk and milk products. Our Company has been openly, extensively and continuously using "Gokul" as our brand name for all our operations, including business and marketing. In the event that the Registrar of Trade Marks rejects our trademark application, our Company may be subject to liability for damages or it may prevent us from using the the same logo or Trade Mark, which may impact our business and reputation.

Risks relating to our Business

- 10. Our business is dependant on the availability/supply and cost of raw materials which we source from domestic suppliers. Any significant increase in the prices of these raw materials or decrease in the availability of the raw materials, could adversely affect our results of operations.**

Raw materials, namely rape seed, mustard seed, mustard cake, etc., form the major raw materials for our business, and represent a significant portion of our expenses. For the financial year 2006 - 2007, financial year 2005 – 2006 and financial year 2004 - 2005, our total restated raw material costs amounted to Rs. 141,309 Lacs, Rs. 114,680.16 Lacs and Rs.102,603.77 Lacs which amounted to 88%, 91% and 91% of the total revenue in these respective years. Although we have established relationships with various domestic suppliers of raw materials, any significant increase in the prices of these raw materials or decrease in the availability of the raw materials for whatever reason, including climatic change, could adversely affect our results of operations and consequently, our sales and profitability.

- 11. Our company depends significantly on imports of raw materials in addition to domestic suppliers. Any disruption in the supply of raw materials or changes in the import duty structure might effect our results of operations.**

Due to the seasonal nature of availability of raw materials in India, we also rely on import of raw materials. Although we have not experienced a disruption in our supply of raw materials in the past, an inadequate supply of raw materials of sufficient quality caused either by the default of the supplier or for any other reason could hamper our operations. In such a situation, the raw material requirements can be met through domestic suppliers which may increase our cost. We may seek to pass on some or all of the additional costs of raw materials to customers; we cannot ensure you that we would be successful in doing so. This may adversely affect our results of operations, and consequently our sales and profitability.

- 12. Our Subsidiaries and some of our group companies have incurred losses and/or have negative net worth. Upon consolidation the losses of these subsidiaries shall affect our standalone results of operations. In case of these group companies, there shall be no impact on the financials of our Company as our Company does not have any shareholding in these group companies.**

Some of Our Group Companies have incurred losses and/or have negative net worth (pursuant to non consolidated financial statement) as set forth in the table below:

Name of Group company	Period ended 30-Nov-2007	Fiscal 2007	Fiscal 2006	Fiscal 2005

--	---	-----	--------------------	-----

13. **We have had a negative net cash flow from operating activities of Rs. 539.70 Lacs for FY 2007, Rs. 2118.11 Lacs for FY 2006 and Rs. 1891.02 for FY 2004. Our cash flows in the future may be negative, which may hamper our ability to meet our financial obligations**

14. **Our business is subject to regulation by several authorities, which could have an adverse effect on our business and our results of operations.**

Our business is subject to regulation under the Prevention of Food Adulteration Act, 1954, the Gujarat Essential Articles (Licenses, Control and Stock, Declarations) Order, 1981, Edible Oils Packing (Regulation) Order, 1998, Vegetable Oil Products (Control) Order, 1947 etc., in the areas in which we operate, pollution control laws like the Environmental Protection Act, 1986, the Water (Prevention and Control of Pollution) Act, 1981, the Air (Prevention and Control of Pollution) Act, 1981 and the Hazardous Waste (Management and Handling) Rules, 1989. For more details on the regulations and the policies that regulate our industry, please refer to the section titled “Key Industry Regulations and Policies” on page 147 of the Prospectus. If we cannot comply with all applicable regulations, our business prospects and results of operations could be adversely affected.

15. **Our Company has entered into Memorandum of Understanding with Gujarat Minerals Development Corporation Limited (GMDC) for establishment of 135 MW Captive Power Plant under Special Purpose Vehicle Company registered under the Companies Act 1956 namely Gujrat Gokul Power Limited (GGPL).**

Our Company’s share currently in GGPL is 48% and the funds will be deployed from time to time over a period of next 3 years. If the project is not completed or implemented in time, it may affect the investment of Our Company in the same. Further the investments may strain the financial / cash resources of our company thereby effecting the financial and business operations.

16. **We may be required to pay an estimated amount of Rs. 153.37 Lacs to the Government of India if we do not meet our export obligations pursuant to the Government of India’s Export Promotion Capital Goods Scheme this might have an effect on our results of operations.**

We have imported some of our equipment under license pursuant to the Government of India’s Export Promotion Capital Goods (EPCG) scheme. As a result, we are required to export goods amounting to Rs. 4477.31 Lacs. In addition, we plan to import machinery for the additional production facilities that we plan to import under the EPCG scheme. We, therefore, expect to be required to export additional goods, over eight (8) years from the date we import the additional machinery. We may, from time to time, make additional imports pursuant to the EPCG scheme. If we do, our export obligations will expand.

17. **Our products are edible items, and any dispute with consumers, regarding the quality of our products, may negatively affect the image and reputation of the Company; and in turn our revenues and profitability.**

Our Company is involved in an extremely competitive industry, where goodwill and reputation are of huge significance. Refining of edible oil involves several complex processes like degumming, neutralizing, bleaching, and deodorizing. Although we have been in the business of refining edible oils for the past 15 years, any occurrence of negligence and/or oversight in the process of refining, may lead to impure oil being sold in the market which could be harmful for the consumers. Further, such incidences may expose our Company to liabilities and claims, which could adversely affect our growth and profitability.

- 18. We have limited production capabilities. As a result, we might be unable to market our products in an aggressive fashion.**

We have production facilities at Gujarat only, though currently our products are being sold in 19 states, we might have to face stiff competition and might not be able to market our products in an aggressive fashion for various reasons, which might effect our results of operations and might impede our growth prospects

- 19. The “Gokul” brand does not enjoy national recognition; this might impede our growth rate and our profitability.**

Our presence is in 19 states across India and we are currently working to further build our “Gokul” brand and increase brand recognition in order to help us compete with and to distinguish ourselves from our competitors, we cannot assure you that this initiative will be successful.

- 20. We face significant competition, and if we are not able to compete effectively in the edible oils industry, our business, results of operations and financial conditions will be adversely affected.**

During the financial year 2006-2007, the edible/non-edible oil sales accounted for 86.6% of our total revenue. We face intense competition from both our direct competitors and bulk importers of edible oil in India. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Although we have competed successfully in the past, we cannot be certain that we will continue to compete effectively as we expand into new markets.

- 21. Our Company had purchased vide a sale deed dated February 15, 2007 from Rajhans Vegetable Oil Refinery Private Limited, industrial land, factory building, shed, plant and machinery at a consideration of Rs. 387.50 plus stamp duty and registration totaling to Rs. 408.77 Lacs. It was an open market transaction and no external agency was engaged in the valuation of the purchase. The valuation was done by the management internally and not by any external agency. There may be a risk of incorrect valuation in taking over the assets.**

- 22. We depend on our suppliers for requirement of equipment and related component parts. Any problem with the equipment or these suppliers could have an adverse effect on our business or results of operations.**

Our production facilities are equipped with equipment manufactured by a number of manufacturers in Germany, Italy, US and India. We rely on the manufacturers of the equipment to provide us with component and replacement parts for our refining, seed crushing and related equipment. If we encounter difficulties with this equipment and the manufacturers are unwilling or unable to assist us in correcting such difficulties in a timely fashion or at all, or if any of the manufacturers were to stop supporting such equipment or were to go out of business, we could face serious disruption in our operations. Although we might be able to acquire alternative equipment, we might be able to do so only at significant expense or encounter significant delays in doing so, causing disruption to our production operations. Moreover such alternative equipment might not meet the same quality standards as our current equipment and might require us to provide retraining to certain of our employees. Such costs, lower quality or disruptions could have an adverse effect on our business or results of operations.

- 23. We do not have long-term contracts with suppliers and typically operate on the basis of purchase orders. Any disruption in the supply chain might effect our production processes and consequently our results of operations.**

As we typically operate on the basis of purchase orders, the terms governing our transactions

with suppliers may, as a legal matter, be unclear. In particular, where the terms provided in our documentation vary from those provided in the purchase orders of our suppliers, we cannot assure you that the terms we have presented will govern and we may, as a result, be subject to additional conditions in respect of our supplier transactions. If this were to occur, it could affect our revenues and profitability.

24. We are heavily dependant on our Promoters and the loss of their guidance and services may adversely affect our business or results of operations.

Our success and future performance is substantially dependent on the guidance and foresight of our Promoters. The loss of the services of the Promoters, for any reasons whatsoever, could have an adverse effect on our business and results of operations.

25. We are dependant on our senior management team and the loss of team members may adversely affect our business or results of operations.

We have a team of professionals to oversee the operations and growth of our businesses. Our success and future performance is substantially dependent on the expertise and services of our management team, including our senior management team, our Directors and other key managerial personnel. The loss of the services of such management personnel or other key personnel could have an adverse effect on our business and results of operations. Further, our ability to maintain our leadership position in the edible oils business depends on our ability to attract, train, motivate and retain highly skilled personnel. For further details, see "Our Management" on page 157 of the Prospectus.

26. Our business is dependent on our production facilities and the loss of or shutdown of operations of the production facilities could adversely affect our business or results of operations.

We currently have three production facilities, at Sidhpur, Gandhidham, and Surat. Our production facilities are subject to operating risks, such as the breakdown or failure of equipment, performance below expected levels of output or efficiency, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our production facilities use heavy equipment and machinery, and whilst that equipment and machinery is insured, the breakdown or failure of such equipment or machinery may result in us having to make repairs or procure replacements, which may take considerable time or expense. Accordingly, any significant operational problems or the loss of our manufacturing facilities for an extended period of time could adversely affect our business or results of operations.

27. All our facilities are geographically located in the state of Gujarat. Any localized social unrest; natural disaster or breakdown of services and utilities in Gujarat may affect our business adversely.

Our Company and all our manufacturing and refining facilities are located in the state of Gujarat. As a result, if there is widespread social unrest, natural disaster or breakdown of services and utilities in the State of Gujarat it may affect our business adversely.

28. We have not provided for the following contingent liabilities which could adversely affect our financial condition, if these liabilities crystallised.

As on November 30, 2007, there were contingent liabilities as under:

(Rs. in Lacs)

Sr. No.	Particulars	Amount
1	For Corporate guarantee given	3,500.00

2	For gurantee given to Banks.	450.00
3	For Disputed Income Tax Liabilities	62.63
4	For Disputed Interest on education Cess on Custom Duties	21.78

29. Our agreements with various banks for term loans contain restrictive covenants for certain activities, if we are not able to get their clearance it might restrict our scope of activities and impede our growth plans.

In the agreements for short term and long term borrowings taken from certain banks and financial institutions, there are restrictive covenants which provide restrictions, namely change in capital structure, declaring dividends, further expansion of business, taking up new business activity or setting up/ investing in subsidiary except in the ordinary course of business and which require our Company to obtain prior approval of the lenders for any of the above activities. Our Company cannot assure the investors that our lenders will provide us with these approvals in the future. However, for the proposed Issue we have received approvals from all our lenders. For details of these restrictive covenants, please refer to the section titled, “Financial Indebtedness” beginning on page 213 of the Prospectus.

30. Our Company deals in hazardous chemicals and if we fail to comply with environmental laws and regulations, our operations might be affected.

Our Company uses certain chemicals for refining, which are subject to laws and regulations related to environmental, health laws and prevailing regulations in India and abroad. Under these laws and regulations, our Company is required to control its use of raw materials under specified standards and discharge of effluents, which are hazardous to environment and biological lives. If we fail to comply with these laws and operational regulations, then we may be imposed with penalties, fines or imprisonment. As a result of the same, operations of our Company can be suspended and our manufacturing licenses/ permissions can be withdrawn or terminated which may adversely affect our profitability. At present we have obtained the permission of the Gujarat Pollution Control Board for using hazardous chemicals. Further in case, any new regulation is imposed in this regard, we may have to incur additional expenditure or be required to acquire additional equipment with such specification as may be prescribed by the concerned authorities, in order to comply with such new law or regulation.

31. Our Company is exposed to liability, arising from the hazardous procedure involved in the processing and refining of edible oils.

The processing of oil, inside a boiler, involves dealing with high temperatures. This is an extremely hazardous process and can expose our Company to liabilities and claims, in case of occurrence of any accident. Further, our Company uses certain chemicals for refining, which may be hazardous to the environment and may lead to damage of assets, stock, premises and loss of human lives. Such incidences may lead to unforeseen costs and we may have to compensate for any losses or damages suffered by third parties as a result of such incidents.

32. Our Promoters will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoters group will collectively own 69.76% of the Equity Shares (on a fully diluted basis). As a result, our Promoters will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 1956 and our Articles of Association. See “Main Provisions of the Articles of Association” on page 320 of the Prospectus for further details. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

33. Certain risk factors as per the GITCO Appraisal Report, which if not mitigated might effect our profitability and results of operations.

- (i) The business of edible oils is often driven by customers' preferences where generally high quality products are sought. Change in the domestic and international market in terms of customers' preferences may bring about a significant decline in the prices of our products, thereby affecting our sales and profitability.
- (ii) We face competition from both our direct competitors and bulk importers of edible oil in India. Our principal product namely, edible oil is produced by a large number of manufacturers, both in India and abroad, some of whom are significantly larger and have greater financial, distribution, and marketing resources than our Company. Moreover, we may lose market share and sales revenue to our competitors and could be adversely affected.
- (iii) If we fail to enter into firm sales contracts, any fall in the prices of refined oil may lead to financial losses for our Company.
- (iv) Any significant change in the government's policies or any political instability in India could adversely affect business and economic conditions in India and could also adversely affect our business

34. Certain risk factors as per the SBI Appraisal Report, which if not mitigated might effect our profitability and results of operations.

- i. With the influx of foreign players in the domestic oil industry, namely Wilmar, Cargill Asia Pacific, Felda of Malaysia, Gary Seaton of Singapore, the small Indian players will find it increasingly difficult to cope up with the competition.
- ii. World oilseed supply during FY 2005-06 resulting in pressure on the edible oil prices. The edible oil trade is speculative in nature
- iii. The industry is over dependent on Government's concessions & subsidies for its survival & growth. Hence, any change in policy has significant impact on the industry. The units, largely dependent on imported raw material, are vulnerable to revision in duty by the government
- iv. Risk of RM price fluctuations. A very close tab on price movements and the changing global trends are essential.

35. Common risk factors from the Appraisal reports of GITCO and SBI are as follows:

- (i) Any significant change in the government policies relating to Excise and Customs could adversely effect our business.
- (ii) Competition from both national as well as International players may result in loss of market share and create pressure on our profit margins.
- (iii) Risk of raw material price fluctuations could impact our profitability.

36. There is a qualification in the Auditors Report on Financial Statements relating to non provision of Custom duty payable on raw materials in bond, as a result the Assets and Liabilities are understated to that extent though there is no effect on the Profit and Loss Account.

The Auditors report on restated financial statements included in the Prospectus contains qualification regarding non provision of Custom duty payable on raw materials in bond, as a result the Assets and Liabilities are understated to that extent though there is no effect on the Profit and Loss Account. For further details please refer the paragraph titled Notes to Accounts in the section titled “Financial Statements” on page 184 of the Prospectus.

- 37. We have availed certain credit facilities for working capital, which can be recalled by our lenders at any time. This might lead to a temporary cash deficit and accordingly might affect our cash flows.**

The State Bank of India, as lead bank of the SBI Consortium, has by its letter dated January 8, 2007, sanctioned a working capital loan. This facility can be recalled by the SBI Consortium at any given time. For further details, kindly refer the section titled “Financial Indebtedness” on page 213 of the Prospectus.

- 38. Our Company has taken certain unsecured loans to the tune of Rs 1662.91 Lacs, for some loans, no specific terms are mentioned. The said loans can be recalled by the lenders at any given point of time, thereby affecting our cash flows.**

Our Company has taken certain unsecured loans from various lenders amounting to Rs. 1662.91 Lacs as on November 30, 2007. There are no specific terms with regard to the repayment of these loans as they are not secured by a charge on any of the assets of our Company. Due to the absence of any specific terms regarding their repayment, the said loans can be recalled by their respective lenders at any given point of time and our Company will be forced to make arrangements for their repayment, which could affect our immediate cash flows.

- 39. Any inability to manage our growth could disrupt our business and reduce our profitability.**

We have experienced significant growth in our total restated income in recent years. We expect this growth to place significant demands on both our management and our resources. This will require us to evolve and improve our operational, financial and internal controls across our organization. In particular, continued expansion increases the challenges involved in recruiting, training and retaining sufficient skilled technical, sales and management personnel; adhering to our quality and process execution standards; maintaining high levels of customer satisfaction; and developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems. Any inability to manage growth may have an adverse effect on our business, results of operations and financial condition.

- 40. We may not have knowledge of certain inspection proceedings initiated at different locations concerning prevention of food adulteration.**

We may not be aware of certain inspection proceedings initiated against us under Prevention of Food Adulteration Act, 1954, at local levels due to the vast expanse of our business. We may not receive timely communication of the food sample inspections etc., collected by the food inspectors from the various storage and distribution centres like shops, depots and godowns of our company and our agents.

- 41. Changes in technology may render the current technologies obsolete or require us to make substantial capital investments.**

The business of our Company is largely dependent on the technology adopted by us. The manufacturing process in the edible oils industry is prone to technological and process changes, which may render our current processes obsolete. In order to compete successfully with our competitors, our Company may be required to invest substantial sums to adopt newer technologies and processes, which may have an adverse impact on the business and

profitability of our Company.

42. Exchange rate fluctuations may adversely affect our financial performance.

We are exposed to exchange rate risk. Many of our capital expenditures for machines are priced in foreign currencies, including the Euro and the United States Dollar. During financial year 2006-2007, approximately Rs. 210 Lacs of our capital expenditures, for proposed project in Gandhidham, or approximately 33%, excluding depreciation, of our total revenue expenditures, were denominated in foreign currencies. In the future we may incur additional foreign currency denominated capital expenditure due to our expansion plans and requirements for imported machinery. In addition, we receive payments in various currencies from our export customers. From time to time, we enter into foreign currency derivative transactions in respect of our international imports and exports.

Further, our wholly owned subsidiary Maurigo International Limited (MII), Mauritius and Maurigo Pte Limited (MPL), engages in commodity futures contracts, which constitutes a significant part of its revenue. Transactions for futures contract carry a high degree of risk and a relatively small market movement may have a proportionately larger impact on the funds that may have been deposited. It may result in total loss of initial margin funds and any additional funds deposited with the futures broker to maintain the company's position, which may have an adverse impact on the financial conditions of the company. Additionally, cash flows of MII and MPL, from financial instruments, in currencies other than the functional currency (United States Dollar), may also be affected by fluctuations in the prevailing exchange rates. For details of the financial condition of MII refer to the section titled "Financial Information of Group Companies" on page no 206 of the Prospectus.

43. Commodity price fluctuations may adversely affect our financial performance.

In our industry, the total processing cycle, starting from the purchase of raw materials to the sale of finished products, is about 90 –120 days. Although our Company does engage in commodity futures contracts from time to time to hedge a portion of our exposure to commodity price fluctuations.

44. Our exposure to interest rates may adversely affect our financial performance.

We borrow from time to time in Indian Rupees. Adverse movements in interest rates may adversely affect our results of operations and financial condition.

45. Some of our Agreements have not been adequately stamped and/or signed making them inadmissible as evidence in the court of law.

Due to the vast expanse of our business involving interaction at various levels with various third parties, it is possible that some of the agreements which we have entered into might be inadequately stamped. As a result of this, these documents might be inadmissible as evidence before a court of law.

46. We enter into certain related party transactions, If these transactions are not at arms length price, it might effect our results of operations.

We have entered into, and may in the future enter into, certain related party transactions with our Promoters and entities within the Promoter Group, including companies engaged in our same or related lines of business.

Additionally, as our Promoters will retain control of our Company after this Issue, we can provide no assurance that our transactions with such related parties will in all circumstances be made on an arms' length or commercial basis. For more information regarding our related party transactions, please refer to the paragraph titled "Related Party Transaction" in the chapter titled "Financial Statements" on page 179 of the Prospectus.

- 47. One of our Promoter Group entity viz. Gokul Overseas has a similar line of business and might have common pursuits to that of our Company and could possibly compete with our Company.**

One of our Promoter Group entity viz. Gokul Overseas has a similar line of business to that of our Company and could possibly compete with our Company. The interest of this entity may conflict with our Company's interests. For details regarding this entity, please refer to the paragraph titled "Gokul Overseas" in the chapter titled "Financial Information of Group Companies" on page 206 of the Prospectus.

- 48. Our Company has issued Equity Shares to the Others under Pre-IPO placement and under Private Placement in the last one year at Rs. 185 per share (inclusive of premium of Rs. 175), which might be less than the Issue Price of the proposed Issue. For further details of please refer the chapter titled "Capital Structure" on page 66 of the Prospectus.**

B) RISK FACTORS EXTERNAL TO THE COMPANY:

- 49. Our inability to respond to changing customer preferences and trends in the market for edible oils will significantly affect our Company.**

Any change in the domestic and international market in terms of stiff competition and change in customers' preferences may bring about a significant decline in the prices of our products, thereby affecting our sales and profitability.

- 50. A significant change in the Government of India's economic liberalization and deregulation policies could disrupt our business and cause the price of our Equity Shares to decline.**

Our assets and substantially most of our customers are located in India. The Government of India has traditionally exercised and continues to exercise a dominant influence over many aspects of the economy. Its economic policies have had and could continue to have a significant effect on private sector entities, including us, and on market conditions and prices of Indian securities, including the Equity Shares. The present government, which was formed after the Indian parliamentary elections in April-May 2004, is headed by the Indian National Congress and is a coalition of several political parties. Any significant change in the government's policies or any political instability in India could adversely affect business and economic conditions in India and could also adversely affect our business, our future financial performance and the price of our Equity Shares.

- 51. The price of the Equity Shares may be volatile after this Issue, and therefore, sale of such shares in the secondary market might affect your profitability.**

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after this Issue may be subject to significant fluctuations in response to, among other factors, our results of operations and performance, subsequent corporate actions taken by us, performance of our competitors, adverse media reports and reviews, market conditions specific to the Indian edible oil industry, and the market perception about investments in the edible oil industry.

- 52. Any change in tax laws in India, particularly central excise, sales tax or income tax might lead to an increase in the tax liability of our Company thereby having an adverse impact on the post tax profits of our Company.**

- 53. Frequent changes in import duty of the raw materials will lead to price fluctuations and uncertainty in the domestic market, which may have an adverse effect on the profitability of our Company.**

Due to low productivity and seasonal nature of availability of raw materials, the supply of edible oils in India has not kept pace with the demand for it. This has led to the creation of a gap, which is being met through imports, whilst the increase in population is further widening this gap. Moreover, the government frequently changes the import duty on edible oil to help domestic farmers. This in turn leads to price fluctuations and uncertainty in the domestic market, which may have an adverse effect on the profitability of our Company.

- 54. A slowdown in economic growth in India could cause our business to suffer.**

The Indian economy has grown at 7.5% and 9.0%, respectively, in fiscal 2005 and 2006. According to the Economic Survey of India for fiscal 2007, the advance estimate for growth of GDP in fiscal 2007 was 9.2%, up 0.2% points over the 9% growth recorded in fiscal 2006. Any slowdown in the Indian economy and the consequent impact on disposable income could adversely affect our income, which could adversely affect our results of operations.

- 55. Any downgrading of India's debt rating by an international rating agency could negatively impact our business.**

Any downward revisions to India's credit ratings for domestic and international debt by international credit rating agencies may adversely impact domestic interest rates and other commercial terms on which such additional financing is available. This could have a material adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditure and the trading price of our shares.

- 56. Stringent environmental laws and regulations may envisage further investments in the technology we use to comply with the new laws.**

Our Company requires certain statutory and regulatory permits and approvals for existing businesses under various environmental laws. Moreover, unknown environmental problems or conditions may be discovered. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future.

- 57. Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.**

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability.

Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

- 58. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.**

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. Natural calamities could have a negative impact on the Indian economy, adversely affecting our business and the results of our operations.

SECTION III: INTRODUCTION

SUMMARY OF INDUSTRY AND BUSINESS OF OUR COMPANY

This is only a summary and does not contain all information that you should consider before investing in Equity Shares of this company. INDUSTRY OVERVIEW

India is world’s third largest edible oil economy, after China and US. India’s annual consumption is around 10 million tonnes vis-à-vis China’s 14.5 million tonnes. However, India’s per capita consumption at 10.2 kgs per annum is considerably lower compared to global standards. India is also a leading producer of oilseeds, contributing 7-8% of world oilseed production. India is estimated to account for around 6% of the world’s production of edible oils. Though it has the largest cultivated area under oilseeds in the world, crop yields tantamount to only 50-60% of the world’s average. India is the fifth largest producer of oilseeds in the world, behind US, China, Brazil, and Argentina. Since 1995, Indian share in world production of oilseeds has been around 8-10%.

Edible oil processing consists of three operations: crushing and expelling (separating oil from the solids), solvent extraction (to chemically remove residual oil from the oilcake solids), and oil refining. In many countries, these three separate processing operations are conducted by one vertically integrated plant. In India, however, only a small share of oilseed production undergoes solvent extraction and oil refining. Instead, India’s oilseeds processing sector is made up of the three groups viz Ghanis, solvent extractors and oil refiners engaged separately.

Edible oils constitute an important component of Indian households’ expenditure on food. A large Population and steady economic growth are important contributors to India’s increasing consumption and imports.

Strengths

- The promoters have long experience in this line of activity.
- Strong financial position with ROCE of 20%-27 % and EPS growth of 24 % in last 3 years.
- Buoyant growth prospects for the edible oil market in India.

Concerns

- Earnings are vulnerable to changes in the duty differential between crude and refined oil; & the business is characterized by inherently low margins.
- Primarily present in the bulk market, where there are strong competitive pressures from the unorganized segment.
- The company faces challenges in terms of further professionalizing its management set up and board of directors.

New Project –Risks and prospects

GRSL plans to utilize around Rs 6300 Lacs out of the IPO proceeds for the following two projects:

Setting up of a new 1500 TPD Soyabean processing plant near Gandhidham, Gujarat:

The Gandhidham unit of GRSL is currently into refining of palm & soyabean oil and vanaspati manufacturing. As a step towards backward integration the company has set up a Soyabean processing plant including crushing, refining and extraction facilities. The output of the new plant i.e soyabean oil will be an input of the existing refinery, thereby increasing the overall capacity utilisations of the refinery during the season wherein imports of oil are not economically viable vis-a-vis purchase of local oil. The estimated cost of project is Rs 5100 Lacs & the project has been appraised by Gujarat Industrial and Technical Consultancy Organization Limited (GITCO). The seed processing capacity has already started trial runs.

Expansion of existing edible oil refinery at Surat from 100 TPD to 400 TPD The Surat unit of GRSL is currently into oil refining having a capacity of 100 TPD. The company now intends to add another 300 TPD refining capacity taking the total capacity of the plant to 400 TPD. GRSL intends to import oil through Dahej port or Hajira Port and process it at Surat, so as to cater to south Gujarat and Mumbai markets. The expansion plan is already under implementation with the orders for plant and machineries been placed. The total cost of project is estimated to be Rs. 1230 Lacs, which is intended to be financed from IPO proceeds.

The execution risks involved in both the above projects is low, and the projects are close to starting commercial production.

For further details, please refer the chapter titled “Terms of the Issue” beginning on page 279 of the Prospectus.

Our Company will comply with the SEBI Guidelines and any other ancillary directions issued by SEBI for this Issue. In this regard, our Company has appointed Anand Rathi Financial Services Limited and Intensive Fiscal Services Private Limited as the BRLMs to manage the issue and to procure subscriptions to the Issue.

The process of Book Building, under the SEBI Guidelines, is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

Illustration of Book Building and Price Discovery Process *(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue)*

Bidders can Bid at any price within the price band. For instance, assuming a price band of Rs. 20/- to Rs. 24/- per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price

would be made available at the bidding centres during the bidding period. The illustrative book as shown below shows the demand for the shares of the issuer Company at various prices and is collated from bids received from various investors.

Number of equity shares Bid for	Bid Price (Rs.)	Cumulative equity shares bid for	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e., Rs. 22/- in the above example. The issuer, in consultation with the BRLMs will finalise the issue price at or below such cut-off price i.e. at or below Rs. 22/-. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

Steps to be taken by the Bidder for Bidding:

- Check eligibility for making a Bid (for further details, please refer to the paragraph titled “Issue Procedure-Who can Bid” beginning on page 286 of the Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid-cum-Application Form;
- Ensure that the Bid-cum-Application Form is duly completed as per instructions given in the Red Herring Prospectus and in the Bid-cum-Application Form;
- Each of the bidders should hold a valid Permanent Account Number allotted under the IT Act and mention his/her Permanent Account number in the application form while bidding for this issue.. **It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN as the Bid is liable to be rejected on this ground;**
- Bids by QIBs will have to be submitted only to the BRLMs.

Withdrawal of the issue

Our Company in consultation with the BRLMs, reserves the right not to proceed with the issue at anytime after the Bid/Issue Closing Date but before the Allotment of Equity Shares, without assigning any reason thereof.

Further based on the GITCO report, State Bank of India has also done the appraisal vide its letter dated October 26, 2007. These estimates are based on current business conditions and are subject to change in light of any changes in external circumstances like market dynamics, costs, or other financial condition, business or strategy.

APPRAISAL

Two of the aforesaid objects of the issue i.e. project of setting up of Soyabean processing plant with an installed capacity of 1500 TPD at Gandhidham, Kutch, Gujarat. & project for expansion of edible oil refinery with the installed capacity from 100 TPD to 400 TPD at Surat, Gujarat have been appraised by Gujarat Industrial and Technical Consultancy Organisation Limited (GITCO), vide their report dated August 24, 2007 and September 7, 2007.

Based on the GITCO report, State Bank of India has also done the appraisal vide its letter dated October 26, 2007. SBI has vide its letter dated October 26, 2007 given its no objection to incorporate the required details in the Prospectus from the project appraisal report. GITCO has vide its letter dated October 6, 2007 has given its no objection to incorporate the required details in the Prospectus from the project appraisal report.

Scope and purpose of the appraisal for the two projects

Our company has approached State Bank of India for its requirement of term and working capital finances. SBI had suggested to obtain a Techno-Economic Viability (TEV) report from GITCO.

Objectives and Scope of the report:

The report examines technical feasibility, market prospects and economic viability of the proposed project. As per the terms of reference, the report deals with the following aspects of the Company and its project:

- Brief history of the Company and broad particulars of the Promoters and their project.
- Product study, status of the industry, demand and supply aspects of the products and market prospects for the proposed project.
- Technical aspects of the project and scrutiny of its technical feasibility.

- Cost of project, means of finance, estimates of working capital requirements and proposed funding arrangement for the same.
- Profitability projections for the next seven years along with detailed analysis of the financial viability of the project.
- SWOT analysis, Sensitivity analysis and ratio analysis
- Key elements of the project.
- Revision in the project cost and means of finance after date of issue of the appraisal report to be disclosed and explained

The SWOT analysis as considered by GITCO for the project are as follows:

Strength

- The Company has been operating for the last fifteen years, wide experience.
- The Company has already installed integrated accounting software - ERP, which will enable the management to make in depth analysis at production, marketing and finance levels.
- The contacts developed by our Company are wide which help them to source the trading goods with ease
- The technology chosen is the latest available technology in the world and is capable of adopting quick stock changes within the shortest possible time. This would enable it to respond to dynamics of the market forces.

Weakness

- The products processed by the Company are edible grade perishable items and hence any impurity in the products may lead to excessive negative publicity.
- Inadequate capacities to cater the market demand

Opportunity

- The Promoters have sufficient experience in this line of activity and the government is also encouraging units engaged in exports. The unit at present imports edible oil which has a huge demand in the local market and exports de-oiled meal and castor oil and its derivatives in the international market.
- The edible oil market in India is growing rapidly. India though being one of the largest consumers of edible oil in the world, still has a very low per capita consumption. Thus substantial potential exists for increase in demand for edible oils in future.
- Due to changing habits of the consumers more and more consumers are shifting their traditional consumption habits to refined oil.

Threat

- The business of trading in edible oil is highly dependent on government policies and the customs duty imposed by Government of India has a major impact on the profits of the company.
- Competition from the existing trading houses and new entrants, particularly multinationals is another risk factor. Since our Company will deal in international trade, fluctuations in the foreign exchange rates of currencies cause another risk factor for the Company.
- The total processing cycle from purchase of raw material to sale for the Company operations is about 90 to 120 days and any fall in the prices of the refined oils in this period may lead to losses if the Company has not entered into any firm sales contracts
- Raw material costs is about 85% to 90% of the total costs.

Our Company has taken some major steps to overcome the external threat

- The Company's manufacturing facilities have an inherent capacity to change its product mix. The Company can use this capacity in favor of the edible oil having the highest price advantage and survive in the market. In the long term, the domestic prices will depend on the increase or decrease in the customs duty and international prices, as India is heavily dependent on import of edible oils.

- The company is already having RBI permission for hedging the company's commodity price risk on various edible oils in the International Commodity Exchanges under Foreign Exchange derivatives Contracts, Regulation 2000. The company purchases material from the international markets. The forex risks are covered by booking forward contract, as soon as the contract for import is entered / as soon as the bill of exchange is accepted, depending upon the forward premium rate and market perception. It has employed professionals to manage and hedge these risks.

Conclusion as contained in the GITCO report

- The Company has adopted competitive marketing strategy to cater the increasing demand for edible oil and its derivatives product and it has wide experience in manufacturing quality product and exploring market
- The Company is also trying to cater South Gujarat and Mumbai market effectively with help of Surat refinery.
- The Company is also trying to cater export market for the soya oil meal in various countries as mentioned above.
- By considering these factors the project would have market viability.

I Setting up of a new 1500 TPD Soyabean processing plant near Gandhidham, Gujarat

Currently our Company has a refinery and vanaspati manufacturing facility at Gandhidham, used primarily for refining of palm oil and soyabean oil. As a step towards backward integration our Company has initiated the process to set up a Soyabean processing plant including crushing, refining and extraction facilities. The plant will have an installed capacity of processing 4,50,000 MTPA seed and resulting into 81,000 MTPA of Soya Oil and 3,69,000 MTPA of Soya De-Oiled Cake converting into a capacity of 1500 TPD soya processing plant.

This new integrated plant shall be beneficial to our Company as the output of the new plant i.e soyabean oil will be an input of the existing refinery, thereby increasing the overall capacity utilisations of the refinery and improving the margins. Also the refinery shall be able to utilise its capacity during the season wherein imports of oil are not economically viable vis-a-vis purchase of local oil.

II Expansion of existing edible oil refinery at Surat from 100 TPD to 400 TPD

As market demand for the products of our Company is rising, our Company intends to expand its manufacturing capacities. At present, our Company is having manufacturing facilities at Sidhpur (North Gujarat), Anjar (Kutch) and Surat.

In February 2007, we had purchased an existing functional unit at Surat having a 100 TPD Oil refining capacity. We have already initiated an expansion plan of this undertaking and will be adding another 300 TPD refining capacity taking the total capacity of the plant to 400 TPD.

This location has its own inherent advantages as imported oil can be brought from Dahej port or Hajira Port and can be processed at Surat, so as to cater to south Gujarat and Mumbai markets. This will not only reduce transportation cost and result in substantial savings but also enable us in delivering refined oil on a regular and timely basis.

The expansion plan is already under implementation, the existing land is sufficient for the same, the factory building is being constructed.

Our Company has purchased a 100 TPD plant vide a sale deed dated February 15, 2007 from Rajhans Vegetable Oil Refinery Private Limited, including industrial land, factory building, shed, plant and machinery at a consideration of Rs. 387.50 plus stamp duty and registration totaling to Rs. 408.77 Lacs. The seller is not related to our Company or Promoters. It was an open market transaction and no external agency was engaged in the valuation of the purchase.

Currently we are sourcing about 1,50,000 MT of Palm oil from Malaysia and Indonesia and 1,00,000 MT of soyabean oil from Argentina and Brazil. All major players of the world have their offices in Singapore. Background and Size of the Indian Edible Oil Industry

India is world's third largest edible oil economy, after China and US. India's annual consumption is around 10 million tonnes vis-à-vis China's 14.5 million tonnes. However, India's per capita consumption at 10.2 kgs per annum is considerably lower compared to global standards. India is also a leading producer of oilseeds, contributing 7-8% of world oilseed production. India is estimated to account for around 6% of the world's production of edible oils. Though it has the largest cultivated area under oilseeds in the world, crop yields tantamount to only 50-60% of the world's average. India is the fifth largest producer of oilseeds in the world, behind US, China, Brazil, and Argentina. Since 1995, Indian share in world production of oilseeds has been around 8-10%.

Edible oil processing consists of three operations: crushing and expelling (separating oil from the solids), solvent extraction (to chemically remove residual oil from the oilcake solids), and oil refining. In many countries, these three separate processing operations are conducted by one vertically integrated plant. In India, however, only a small share of oilseed production undergoes solvent extraction and oil refining. Instead, India's oilseeds processing sector is made up of the three groups viz Ghanis, solvent extractors and oil refiners engaged separately.

Edible oils constitute an important component of Indian households' expenditure on food. A large Population and steady economic growth are important contributors to India's increasing consumption and imports. The following table shows the import of edible oil made from November 2006 to September 2007.

Particulars	Qty in M.T.
Palmolein	102502
Refined Soybean Oil	9120
Crude Palm Oil	2624632
Sunflower Oil	192795
Soyabean Oil	1225010

Types of Oils commonly in use in India

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard/rapeseed, sesame, safflower, linseed, nigerseed/castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow palm oil in Andhra Pradesh, Karnataka, Tamil Nadu in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, ricebran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Figures pertaining to estimated production of major cultivated oilseeds, availability of edible oils from all domestic sources and consumption of edible oils (from Domestic and Import Sources) during the last few years are as under: -

(In Lacs Tonne)

Oil Year (Nov - Oct)	Production of Oilseeds	Net availability of edible oils from all domestic sources	Consumption of Edible Oils (from domestic and import sources)

Consumption Pattern of Edible Oils in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard/rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically hard fat consumers and therefore, prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture. Vanaspati has an important role in our edible oil economy. Its production is about 1.2 million tonnes annually. It has around 10% share of the edible oil market. It has

the ability to absorb a heterogeneous variety of oils, which do not generally find direct marketing opportunities because of consumers' preference for traditional oils such as groundnut oil, mustard oil, sesame oil etc. For example, newer oils like soyabean, sunflower, ricebran and cottonseed and oils from oilseeds of tree and forest origin had found their way to the edible pool largely through Vanaspati route. Of late, things have changed. Through technological means such as refining, bleaching and de-odourisation, all oils have been rendered practically colourless, odourless and tasteless and, therefore, have become easily interchangeable in the kitchen. Newer oils which were not known before they have entered the kitchen, like those of cottonseed, sunflower, palm oil or its liquid fraction (palmolein), soyabean and ricebran. These tend to have a strong and distinctive test preferred by most traditional customers. The share of raw oil, refined oil and Vanaspati in the total edible oil market is estimated at 35%, 55% and 10% respectively.

Major Features of Edible Oil Economy

There are two major features, which have very significantly contributed to the development of this sector. One was the setting up of the Technology Mission on Oilseeds in 1986. This gave a thrust to Government's efforts for augmenting the production of oilseeds. This is evident by the very impressive increase in the production of oilseeds from about 11.3 million tonnes in 1986-87 to 24.8 million tonnes in 1998-99. There was some setback in 1999-2000 because of the un-seasonal rain followed by inclement weather. The production of oilseeds declined to 20.7 million tonnes in 1999-2000. However, the oilseeds production in 2005-06 is estimated to be 27.73 million tonnes. The other dominant feature which has had significant impact on the present status of edible oilseeds/oil industry has been the programme of liberalization under which the Government's economic policy allows greater freedom to the open market and encourages healthy competition and self regulation rather than protection and control. Controls and regulations have been relaxed resulting in a highly competitive market dominated by both domestic and multinational players

Structure of the Industry

The Indian Oil Industry can be classified into the following segments:

Ghanis- These are very small traditional (cottage industry) crushers usually serving rural villages.

Small scale expellers- These have somewhat more modern facilities with a daily production of upto 10 ton.

Solvent Extractors- These tend to crush and process "hard" oilseeds with low oil content.

Oil refiners and;

Vanaspati manufacturers. The Indian Oil Industry is highly fragmented with a large number of small scale producers.

Status of the Vegetable Oil Industry
(As on August 2006)

Type of Vegetable Oil Industry	No. Of Units	Annual Capacity (Lacs MT)	Average Capacity Utilization
Oilseed Crushing Units	1,50,000 (Approx)	425 (In terms of Seeds)	10-30%
Solvent Extraction Units	711	313 (In terms of Oil-bearing Material)	31%
Refineries attached with Vanaspati Units	127	51 (in terms of oil)	45%
Refineries attached with Solvent Units	297	36 (in terms of oil)	27%
Independent Refineries	585	35 (in terms of oil)	36%
Total Refineries	1009	122 (in terms of oil)	35%
Vanaspati Units	264	53 (in terms of Vanaspati, Bakery Shortening & Margarine)	18%

Oilseeds crushing units include crushing units in the small-scale sector as also in the organized sector. The capacity utilization generally ranges from an average of 10% for the ghanis (small scale sector) to

around 30% in case of the expellers in the organized sector.

Policy

In pursuance of the policy of liberalization of the Government, there have been progressive changes in the Import Policy in respect of edible oils during the past few years. Edible Oil, which was in the negative list of imports, was first de-canalized partially in April, 1994 when import of edible vegetable palmolein was placed under Open General Licence (OGL) subject to 65% of basic Custom Duty. Subsequently import of other edible oils was also placed under OGL, except Coconut Oil. In order to harmonize the interests of farmers, processors and consumers and at the same time, regulate large import of edible oils to the extent possible, import duty structure on edible oils is reviewed from time to time

The major changes that have taken place in the recent years are given in the table below:

August, 2006	With effect from 8.8.2006, special additional duty of customs not applicable on Vanaspati imported from Nepal w.e.f. 11.8.2006, import duty on Crude Palm oil/Crude Palmolein reduced from 80% to 70% and import duty on refined Palm Oil/RBD Palmolein reduced from 90% to 80%.
January, 2007	W.e.f. 24.1.2007, import duty on Crude Palm Oil /Crude Palmolein reduced from 70% to 60%, import duty on refined Palm Oil/RBD Palmolein reduced from 80% to 67.5%, import duty on Crude Sunflower oil reduced from 75% to 65% and import duty on refined Sunflower oil reduced from 85% to 75%.
2007-08 (Budget)	With effect from 1.3.2007, import duty on Crude Sunflower Oil has been reduced from 65% to 50% and import duty on refined Sunflower Oil and other Oils has been reduced from 75% to 60%. Further edible oils (except Soybean oil, rapeseed oil and mustard oil) will attract education cess of 3% of the aggregate of customs duty. With effect from 1.3.2007, all edible oils will not attract Special Additional Duty of customs @ 4%.
April, 2007	With effect from 13-04-2007 import duty on Crude Palm Oil /Crude Palmolein has been reduced from 60% to 50 % and import duty on refined Palm Oil /RBD Palmolein has been reduced from 67.5% to 57.5%

Outlook

With its large population and continued strong economic growth, India is likely to register strong gains in total and per-capita edible oil consumption in the medium term. The country's consumption places India behind only China and European Union. Per capita consumption is expected to increase to 11 kgs in FY2006 and 11.3 kgs in FY2007. Production is expected to increase at a slower rate during 2007 mainly because of an expected decline in India's oilseeds and edible oil production. Only rapeseed production is expected to rise. The extent to which increased consumption is met by Imports—and the types of oil imported—will be strongly influenced by India's trade and domestic agricultural policies, but imports will likely remain strong for the medium term. The financial performance of players in the Indian edible oil industry is expected to be dependent upon oilseed production and edible oil prices. The premium in terms of crushing margins is likely to be hit due to lower domestic production. Refining margins (from crude edible oil) and marketing margins (branded sale) are likely to remain robust due to rising demand. Overall, the near term outlook for the solvent extractors and edible oil producers / marketers remain positive.

By 2010, India's total requirement of edible oils for projected population of 1.25 billion at the projected per capita consumption of about 15 kg per annum.

GLOBAL SCENARIO OF EDIBLE OIL INDUSTRY-

India is the one of the largest consumer importers of edible oil in the world, next only to China and US. India imports palm oil mainly from Malaysia and Indonesia and the soyabean oil from Argentina and Brazil. With the invention of bio diesel, about 15%-20% production of the vegetable oil is being directed towards the bio diesel, and with rising global demand, the availability of the edible oils like palm oil for edible purposes has tightened, leading to spurt in their global / domestic prices.

The expectation of the fall in oilseed production in the Rabi Season of 2007-2008 coupled with the tightening of the supply in the global markets had triggered the prices of edible oil in India to move north.

Price Trend

Indonesia has cut 10% import duty on soyabeans in January 2008 and increased export duty on crude palm oil in December 2007. This was done to increase availability and bring down their domestic prices. Moreover, crude palm oil production of Malaysia, the world's leading producer dropped 15.4% to 1396.1 thousand tonnes in December 2007 from November 2007, while it imported 33.8 thousand tonnes of palm oil, up nearly 132% in same periods, depicting the tight global availability. As a result, the global edible supplies remain tight; demand continues to grow, leading to elevated price levels.

The imports of the edible oil in India in the month of December 2007 had declined by 25% to 276782 Tonne due to the 18% fall in the imports of the crude Palm Oil from countries like Malaysia and Indonesia. The centre has come out with a whole lot of measures to counter rising inflation. All edible crude oil imports have been made duty free. Duty on all refined oils reduced to 7.5%. Hydrogenated vegetable fats and oils duty at 7.5%. Prices of refined soya oil would come down by an estimated Rs. 10 per litre and palm oil could see a drop of Rs. 3 to Rs. 5 per litre.

The Imports and Exports decline

The imports of edible oil declined marginally by 3% to 14 Lac Tonne during the period Nov '06 to Mar '07 from 14.5 Lac Tonne in the corresponding previous period. Of the total imports 98% was in the form of crude and the remaining 2% in the form of refined. The imports of the crude oil stood at 3.1 Lac Tonne in the month of Feb '07, an 18% fall from 3.8 Lac Tonne in the corresponding previous period. The import of refined oil declined steeply by 79% to 3941 Tonne in the month of Feb '07 from 19194 Tonne in the corresponding previous period.

The aggregate exports of the oil meal reduced by 7% to 755450 Tonne in the fiscal year ended March

'07 as compared to the exports of 809925 Tonne in the fiscal year 2006. There had been a steep drop in the exports of Soya meal that stood at 546700 Tonne for the fiscal year ended March '07, a fall of 23% over the corresponding previous period.

Unchanged tariff value, decreasing duty and appreciating rupee to benefit importers

The tariff prices of the edible oil were last changed in July 2006. The tariff rate remains at US\$ 447 for Crude Palm Oil, US\$ 476 for RBD Palm Oil, US\$ 481 for Crude Palmolein, US\$ 484 for RBD palmolein, US\$ 462 for others – Palm Oil and for the crude soyabean oil the tariff value was US \$ 580 per Metric Tonne.

On 13th April 2007, the customs duty on crude palm oil and RBD palm oil were cut by 10%. Inclusive of education cess (of 3%), the revised duty stands at 51.5% for Crude Palm Oil and 59.23% for RBD Palmolein.

India imports about 40-45% of its requirements from other countries. The prices of the crude palm oil were on the rise driven by the demand of the palm oil for the purpose of bio diesel in Malaysia. Indonesia is also not far behind in the rally. However with the reduction in the customs duty, the tariff value being unchanged and the recent firming up of rupee against the dollar, the importers are benefited by the cheaper imports of the edible oil from other countries. This has forced the domestic players to pass on the benefits of the gaining of rupee to dollar that amounted to Rs 1000 a Tonne or Re 1 a Kg to the consumers to eventually equalize the indigenous market with the international. The players have decided to only part of the benefits obtained from the firming of rupee to the ultimate customers. Thereby the companies are still able to earn substantial margins at present, but as the prices come down they would have to pass on further benefits to the ultimate consumers and with the intense competition the companies would experience reduced margins.

Outlook

The production of oilseeds estimated in the year oil year Nov '06-Oct '07 had been estimated at 233 Lac Tonne as against 280 Lac Tonne in the corresponding previous period. Thus the shortfall would have to be imported from other countries. As the country has imported about 14 Lac Tonne for the period Nov '06-Mar '07, therefore the remaining 33 Lac Tonne would have to be imported from other countries.

In a tight demand supply situation, even small change in either of them has cascading severe impact on the prices. In this context, the tightening supplies of edible oils like palm oil due to partial diversion towards bio diesel drive have lead to flare up in their prices. The global edible oil prices are likely to firm up further.

OUR BUSINESS

Overview

Our Company was incorporated on December 29, 1992 as Gokul Refoils and Solvent Private Limited vide Registration No. 04-18745 under the Companies Act, 1956. Subsequently it was converted into a public limited Company vide special resolution passed at the Extra Ordinary General Meeting of the Company held on May 2, 1994, pursuant to which, we received a fresh certificate of incorporation dated July 1, 1994 by the Registrar of Companies, Gujarat.

In the year 1982, our Promoters made a modest start by setting up a small seed processing unit and trading in Edible oils. In line with our long term vision our Promoters incorporated our Company in 1992 and setup a Solvent Extraction plant and an oil refinery at Sidhpur, Gujarat. In 2003 our Company setup the Gandhidham unit with a refinery of 800 TPD and Vanaspati plant of 100 TPD. In 2006 we setup four environment friendly wind mills of 1.25 MW each, in Kutch. II Our Competitive Strengths

Strengths

1. One of the leading players with over 15 years of experience in the Edible oil industry

We are in this industry since the last 15 years and our Promoter Directors have been in this industry for over 25 years. Wide experience of the Promoters has helped our Company to grow at this rate. This experience has allowed us to leverage our existing in-house production skills, relationships with our customers and market visibility to further enhance our existing strength in the Edible oil industry and to expand our product offerings and geographic presence, both within India & abroad.

2. Versatile manufacturing capabilities

Our manufacturing facilities at Sidhpur, Gandhidham & Surat have the ability to provide comprehensive range of oil products. Moreover, we believe that we are one of the few players in the vegetable oil industry in India that are able to produce a broad variety of oil & derivative products. Our facilities are versatile in nature; we can process various types of oils including Palmolein, soyabean, cotton, sunflower, groundnut and mustard. The existing setup is such that we can switch over from processing of one type of oil to another type of oil with the no down time. This gives us extreme flexibility to manufacture all types of oils depending on the market requirement and availability of raw materials at competitive rates. Hence, we are not dependent on any particular source of raw material, whether imports or local purchases. Also in case of failure of a particular type of crop, we believe we shall be less affected as we can refine some other oil or can also import oil as we are near to the ports. A breakup of the different types of oil refined is as given below in the chart:

Production / Refining of different oils in FY 2007 in MT

3. Large-scale, state-of-the-art technology based integrated units

The plant and machinery installed are based on state-of-the-art technology, acquired from world renowned suppliers. Our capacities post expansion will be as follows:

Existing and proposed production Capacities	Annual Installed Capacity MT
Seed Processing	2,04,000
Solvent Extraction	6,30,000
Oil Refining	4,50,000
Vanaspati	60,000

D

Our manufacturing facilities are quite integrated starting from, our own seed processing facilities, Solvent Extraction capabilities, refineries to refine the crude oil, import of crude oil for refining round the year, packaging of the products in our in-house tin cans manufacturing facilities and manufacturing

of Vanaspati ghee. Our existing Sidhpur and Gandhidham units are ISO 9001:2000 certified. We believe that our large-scale and versatile manufacturing infrastructure gives us a significant advantage over other unorganized players in the industry and allows us to compete more effectively with organized manufacturers in this sector. Our large-scale, versatile operations allow us to develop efficient and cost-effective processes for different products at short notice and to maintain capacity to take on new opportunities as they arise. As a result, we are able to reach a wider market through our large scale of operations and to provide a product mix that responds to customer demands.

Improved Product mix

Product mix for FY 2006 in MT

Product mix for FY 2007 in MT

Product mix for eight months ended November 2007 in MT

Our dependence on refined Edible / Non Edible Oils has reduced from 67% in 2006 to 52% in 2007. We are now diversifying our product base and increasing the share of our other products to improve our margins.

We intend to reduce our dependence on the bulk sales market by further expanding our share in the retail market segment. The retail sale forms around 18% of our total sales for the financial year 2006 and forms around 30% of the total sales for the financial year 2007.

4. Optimum capacity utilization

Our Company has been utilizing its capacities at optimum levels, inspite of the constant increase in its capacities over the years. We have been utilizing our capacities of seed processing - 79.12%, oil refining - 73.85%, cake extraction - 66.20% and Vanaspati - 65.81% capacity levels. Operating at such capacity levels will allow us to sustain the competition and enable us to achieve economies of scale, which are not available to the competitors not achieving optimum capacity utilization whether organized or unorganized.

5. High-quality products

We have invested in high-quality, technologically advanced manufacturing equipments to ensure efficient production of high-quality products. The scale of our operations and our experience in the business, have enabled us to provide higher quality products in response to customers demand for “premium” Edible oil. We believe our high-quality products set us apart from the unorganized sector of the Edible oil industry and enable us to compete with the organized players. We also believe that our investment in technology also allows us to provide a higher quality to our overseas customers demanding bulk quantities, allowing us to attract new customers and differentiate ourselves from other competitors.

6. Our wide product range

Our Company has wide range of products, offering Mustard oil, Sunflower oil, Groundnut oil, Cottonseed oil, Palmolein oil, Vanaspati oil and Soyabean oil. We are engaged in the business of oil refining, seed processing, and Solvent Extraction. The Company has varied oil & derivative products in its product basket allowing the customer to choose from them. Commitment to uphold product excellence using ISO 9002 gives a competitive edge to Company’s products. Our Company mainly deals in Edible oils in bulk quantities and consumer retail packs of 15 Kgs, 15 Litre, 10 Litre, 5 Litre, 1 Litre and 500 ml. Penetration in the rural areas is more with smaller packs.

Currently most of our revenues is derived from Edible oils, De-oiled Cakes etc. We also intend to increase our product range by introducing new generation and hygienic products. We derive most of revenue from sales in the domestic market of products mentioned below:

- Solvent extracted Oil
- Refined Soyabean Oil
- Refined Sunflower Oil
- Refined Mustard Oil
- Refined Groundnut Oil
- Refined Cotton Oil
- Refined Palm Oil
- Refined Castor Oil
- Hydrogenated Vanaspati Oil / Vegetable Ghee
- De-Oiled Cake

7. Distribution network

We have a well established network spread across 19 States catered by our 18 C&F agents and their 802 distributors, 3 depots, 15 brokers and their 295 resellers, distributing our products through a total 1133 bulk points of presence. These agents then distribute our products to the numerous retailers spread across the length and breadth of India. Our Company has a strong retailing network, going ahead we will further spread our area of operations. We intend to engage more C&F agents, increase the product visibility by our continuous brand building activities through various incentives and promotional schemes for our C&F agents and distributors to have pan India presence. With the help of distribution network & marketing team, we keep ourselves updated about market demand & consumer requirements. Based on this information & marketing team, we reschedule our production & distribution. We keep adequate stocks at our depots so as to make our product available at short notices.

8. Strategic location of our manufacturing plants

All our plants are strategically located near the source of raw materials to ensure cost savings and optimum logistic benefits. Our manufacturing plants are at

Sidhpur – Situated in the north of Gujarat state in Patan district. It is very close to the main source of raw materials producing areas namely, Rajasthan, Madhya Pradesh & Gujarat, ensuring timely and adequate supply of raw materials viz. mustard seed, soyabean seed, castor seeds.

Gandhidham – This plant is situated in taluka Anjar, district Kutch, Gujarat. It is very near to the

Kandla port thereby ensuring time savings and a cost effective method for import of crude oil during the off season of local seeds availability.

Surat – This plant is very near to the Dahej and Hajira port to ensure continuous supply of imported crude oil and minimum logistic cost. Also this is very near to the end user markets of South Gujarat and Maharashtra state.

9. Export capability

In the Solvent Extraction process we have a by-product (De-Oiled Cake) from the different oils which we produce and process, viz. Mustard, Soyabean, Groundnut, Cotton, etc. We export these by-products, of consistent quality, in bulk quantities, which helps us earn better realizations on our by-products as we save on the logistics cost. Other players with smaller capacities cannot export, as their by-products are in smaller quantity and it is not economically viable to export such small quantities, we also purchase these small quantities from units with small capacities and export. Hence our Company becomes a one point solution supplier for the importers of De-Oiled Cake. This also indirectly allows us to hedge the exchange fluctuation risk related to import of crude oil.

We have increased our export sales from 889.22 Lacs in FY 2006 to 13644.35 Lacs in FY 2007, this has helped us to improve our margins and to diversify our risks, other than offering natural hedge against foreign exchange fluctuations. Break up of our sales between exports and domestic market is as follows:

Geographical sales mix has been favourably improving.

Geographical sales mix for 31.3.2006 (Rs. in Lacs)

Geographical sales mix for 31.3.2007 (Rs. in Lacs)

Geographical sales mix for eight months ended November 2007, (Rs. in Lacs)

10. Increasing global foot print

Our Company has already invested part of investment in its foreign subsidiaries in Singapore & Mauritius. The Mauritius subsidiary is involved in hedging of commodity whereas Singapore subsidiary is involved into procurement of raw material and trading of commodity.

Our Strategy

Backward Integration

As a part of backward integration at the Gandhidham unit, where we are currently using significant capacity in refining crude Soyabean oil, we intend to setup a Soyabean Solvent Extraction plant. The output of the Solvent Extraction plant shall form part of the input of the existing refining unit at Gandhidham.

Perennial Operations

Soyabean seed is available in the local market for approximately 4 months in a crop year. For rest of the year we import crude Soyabean oil. During the local crop season and increased supply in the raw material prices in domestic market tend to reduce, resulting into an imbalance between the import prices and local price of crude oil, hence import of crude oil becomes unviable. To ensure that perennial supply of refined Soyabean oil for our customers, our Company is setting up this Soyabean Solvent Extraction plant which will also help us to increase our exports.

Continuous increase in manufacturing capacities

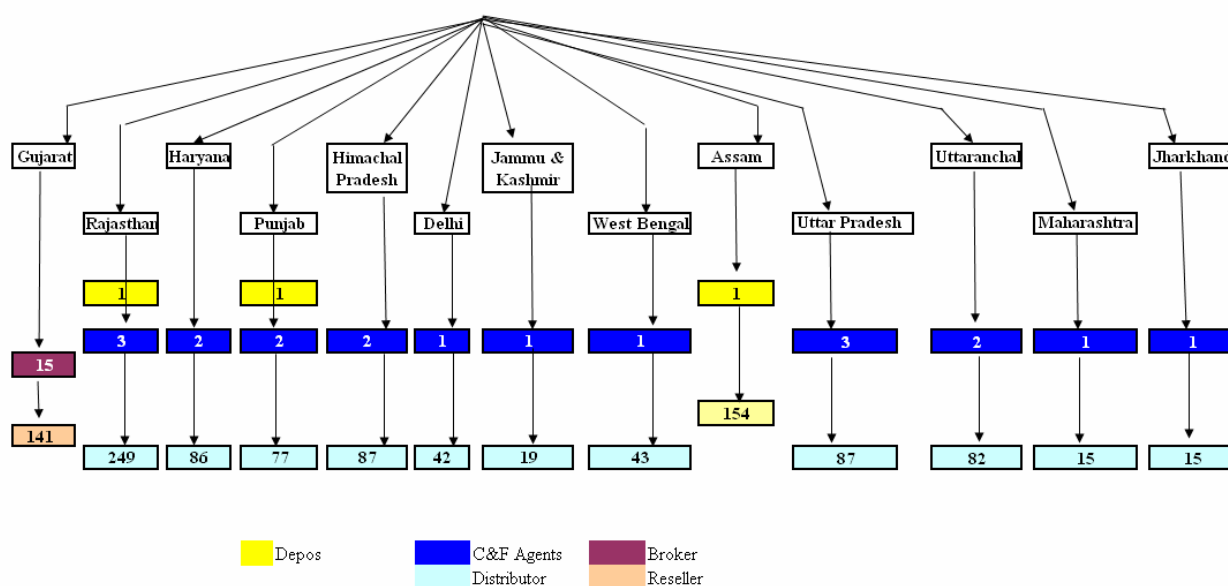

It has been our Company's endeavor to continuously increase our capacities. Our refining capacities were increased from 1100 TPD in FY 2005 to 1200 TPD in FY 2007 and shall increase to 1500 TPD in FY 2008. Further we are also setting up a new Soyabean plant of 1500 TPD to increase the seed processing and Solvent Extraction capacity from 1280 TPD to 2780 TPD. We intend to keep on adding capacities to meet the increasing demand of our products.

Marketing Strategy of the Company

Retailing

We have a well established network spread across 19 States catered by our 18 C&F agents and their 802 distributors, 3 depots, 15 brokers and their 295 resellers, distributing our products through a total 1133 bulk points of presence. These agents then distribute our products to the numerous retailers spread across the length and breadth of India. Our Company has a strong retailing network, going ahead we will further spread our area of operations.

Gokul Group's Network of C&F Agents, Distributors, Brokers and Resellers across India

We shall engage more C&F agents to increase the product visibility by our continuous brand building activities. This will be adequately backed by our brand building and promotional activities. We intend to engage more C&F agents, increase the product visibility by our continuous brand building activities through various incentives and promotional schemes for our C&F agents and distributors to have pan India presence.

Our Company mainly deals in Edible oils in bulk quantities and consumer retail packs of 15 Kgs, 15 litre tin and plastic jars, 5 Litres can, 1 Litre pouches and bottles, 500 ml pouches and bottles. Going ahead, in line with our expansion plans, we intend to market more aggressively our smaller packs of 1 Litre pouches and bottles, 500 ml pouches and bottles for small retail consumers. Penetration in the retail markets is more with smaller packs. The consumption pattern of the low income group shows that people buy ready to use small packs as and when required. We have better realizations on these small packs.

On November 9, 2007, we entered into a strategic tie-up with 'Union Oils Private Limited' to produce, pack, and market "Maruti" brand of edible oil in Gujarat. This tie-up will further boost up the sales of our company. For further details of the agreement please refer the paragraph 'Other Agreements' in the chapter titled 'History and Corporate Structure' on page 151 of the Prospectus.

Brand and Brand Promotion

In tune with our retailing endeavors, we have got our various brands registered. We also intend to create brand for the new generation products developed by innovation. The brand building exercise is a part of that initiative that will enable greater visibility for Company's brands on the retail shelf and will enhance the recall value in the minds of customers thereby leading to increased demand for our products.

Our Company has in financial year 2006 - 2007 incurred nearly Rs. 300 Lacs towards marketing & brand building and succeeded in increasing its retail sales from 18 % to 30 % which has significantly helped us to improve the margins. We have budgeted a brand building exercise of Rs. 1500 Lacs for the years 2007 - 2009. The budget will include brand ambassadors fee, television commercials, radio, newspaper, magazine, advertisements and outdoor media like hoardings, bus panels, etc.

Marketing and Branding activities undertaken by our Company

In the last ten years, we believe, we have successfully introduced and marketed our brand in Gujarat. Till 2003, our Company was doing its business mainly in the state of Gujarat and close by areas. With a view to increase its presence throughout the country, we adopted an aggressive plan of marketing the products in the northern, eastern and the north eastern states of the country.

We promoted our products under the brand name “**GOKUL**” which is currently well known in Gujarat and other states as well. “**GOKUL**” was identified as the umbrella brand under which all oils (including Vanaspati) were marketed and promoted in the **first phase (2004 onwards)**. The first phase marked an entry of Gokul in Rajasthan, Delhi, Haryana, Punjab, J&K, Himachal Pradesh, some parts of Uttar Pradesh, Uttaranchal, Assam and West Bengal wherein our various oils were sold and reached the local retail shelf.

In the **second phase (2006 onwards)** our marketing activities were spread across Maharashtra, Bihar, Jharkhand, Chhattisgarh, remaining parts of Uttar Pradesh, Sikkim and some parts of Tamil Nadu.

In the **third phase (2007 onwards)** in line with our long term marketing strategy of pan India presence we focused our marketing activities towards the rest of the states of India. This was coupled with the branding exercise in news print, media and television.

Increasing global foot print

Our Company has already invested part of investment in its foreign subsidiaries in Singapore & Mauritius. The Mauritius subsidiary is involved in hedging of commodity whereas Singapore subsidiary is involved into procurement of raw material and trading of commodity.

Singapore is the global hub of Edible oil industry with all major oil suppliers having a base in Singapore. Currently we are sourcing about 1,50,000 MT of Palm oil from Malaysia and Indonesia and 1,00,000 MT of Soyabean oil from Argentina and Brazil. All major players of the world have their offices in Singapore. Also the small local and fragmented players of Malaysia and Indonesia have their representative offices in the global oil hub Singapore. If we have our presence in Singapore, we shall be in a position to locally negotiate and deal with the small and fragmented oil suppliers of Malaysia and Indonesia, which will further enable us to procure the raw materials at reasonable terms. Setting up of this office shall be a part of our long term strategy of increasing our foot print in the global markets to reduce the involvement of intermediaries and source raw materials from the producers. The savings in freight and smoother logistics shall be beneficial in improving the operating margins of our Company. It will help us in procuring oil at reasonable terms and also assured supplies round the year. This shall further strengthen our procurement base and ensure continuous supply of raw material for our refining mills in India.

This global presence shall help us to improve the scope of exports of De-oiled cake and our margins in export of De-oiled cake. The subsidiary shall procure raw materials and trade in edible / non Edible oils and their derivatives.

Enterprise Resource Planning

The Company has installed an Enterprise Resource Planning (ERP) to enable to make in depth analysis of its activities to ensure smooth operations of our Company.

Opportunities

Rationalization of tax structure: The oil industry has ample presence of unorganized players. This gives an opportunity to our Company to grow in the new VAT tax regime. We have presence in many states and VAT has been implemented in majority of states where we operate. Thus we are in a position to compete with the local players, hence creating a level playing field. This is a positive step for the Edible oil industry in the country.

The unit at present imports Edible oil which has a huge demand in the local market and exports De-oiled meal and castor oil and its derivatives in the international market.

The Edible oil market in India is growing rapidly. India though being one of the largest consumers of Edible oil in the world, still has a very low per capita consumption. Thus substantial potential exists for increase in demand for Edible oils in future.

Due to changing habits of the consumers more and more consumers are changing their traditional

consumption habits to and moving to refined oil.

Due to seasonal factors, sometimes there is disparity between domestic and international prices of Soyabean oil and in that case, dependence on import may have adverse impact, resulting into discontinuation of Soyabean oil refining. Local production of Soyabean oil will ensure perennial supply of Soyabean oil in the market even during times of price disparity.

Increase in exports will provide natural hedge against currency risk as our Company is a major importer.

In 2006 we setup four environment friendly wind mills of 1.25 MW each.

Summary of the projects

LOCATION OF THE PROPOSED PROJECT

Our Company has decided to set up a Soyabean processing plant at Gandhidham with an installed capacity of 1500 TPD including refining and Solvent Extraction facilities. For this purpose the Company has already purchased a land at Village Meghpar-Borichi, Taluka Anjar, District Kutch on Gandhidham-Anjar National Highway.

PLANT & MACHINERY, TECHNOLOGY AND PROCESS

PLANT AND MACHINERY

The details of the plant and machinery proposed to be installed for the new project have been mentioned under the section “Objects of the Issue” on page 78 of the Prospectus.

TECHNOLOGY AND PROCESS

Technology

Our Company has procured the entire process plant & machinery for the main refinery and the fractionation plant from De Smet Chemfood Engineering Private Limited. The plant is completely automatic that ensures absolute hygiene and purity. Among the various modification processes used in the oils and fats industry, fractionation has gained increasing interest as a proven, widespread and clean technology frequently replacing partial hydrogenation and solvent fractionation.

R&D Facilities

Our Company has R&D facilities to improve their existing product quality and for new product development. For that we installed a pilot plant. Our Company has succeeded in this aspect.

Quality Control and Quality Assurance (QA & QC)

Our Company is following international standards. Our QA & QC ensured good laboratory practices (GLP'S). Our Quality Assurance and Quality control department ensure controls at every stage from raw material purchase to finished product dispatch. We receive raw materials from selected vendors only. After the raw material reaches the unit, our quality assurance department checks the materials for quality, and then certifies. Certified material is then unloaded in our godown / tanks. For controlling the processing, Quality monitoring systems are placed to ensure quality at all steps. At each and every step of processing our quality control department has good control which ensures better quality product to our customers. After completion of the process steps, finished products are checked for quality. Quality is checked both at the time of storage and at the time of dispatch also.

Our QA & QC department has qualified staff and sophisticated analytical equipment like Gas Liquid Chromatography, NMR, Spectrophotometer, Karl Fisher Titrator, Brookfield Viscometer etc., to give quick analysis reports to support the processing people and to improve the quality of our products.

Manufacturing process

Seed processing and Solvent Extraction plant:

Seeds are cleaned to remove impurities like Stones, Broken Seeds, Husks etc. Cleaned seed are then charged into hoppers through chain conveyor. After opening of dumpers, seeds start to pour in the Kettle of the machine, and steam is directly passed through seeds. Centrally revolving clamped shaft passes steam over the seeds making them soft and pushes them to screw press chamber of the machine. Cakes are cleaned to remove impurities like husk, stones particles etc, through pre cleaner and de stoner which are further fed to the cracker breaker to make small pieces. This cake can be fed to the solvent extractor. In the solvent extractor, cakes are sprayed through food grade Hexane and so on and extraction of the oil (7 to 9 %) out of the flakes takes place. This mixer is further fed to De solventiser Toaster to evaporate the hexane particles and oil particles. Output of the Toaster section at bottom is De Oil Cake and is separately collected, conveyed and packed in Gunny Bag or PP bag. Evaporated particles are fed to Distillation and recuperation section to depart oil and hexane. This recovered hexane is reused in the process. So the produced raw grade oil is required to go through refining to produce refined solvent extracted mustard oil.

Refining Process of Edible Oil:

Refining of oil: Refining means to remove impurities from the oil, which are not desirable. Oil has two types of impurities (a) oil soluble as colouring matter, odiferous compound, free fatty acid, gummy

materials etc. (b) other type of impurities are oil insoluble such as sand, seed fragment, dust, straw etc. We are using two methods for refining of raw oil.

- 1) Chemical process
- 2) Physical process

Vegetable oil refining consists of all necessary operations to which oil is submitted in order to obtain a final product of which the colour, taste smell, and stability make it apt for human consumption.

Most of the vegetable oils contain impurities, such as fatty acids, phosphatides, pigments, metals, etc., which have to be removed so as to obtain a product

The different steps of the process depend upon the type and quality of the oil to be treated.

Chemical Process: In chemical process impurities of oil are removed by the reaction of some chemicals. The chemical refining consists in:

- Acid conditioning Neutralization
- Separation of gums and soap in centrifuge
- Washing with water with separation of soaps with centrifuge
- Bleaching
- Deodorizing

Physical process: In Physical process impurities are removed by physical method which means there is no chemical reaction taking place.

- Bleaching
- Deodorizing

Acid conditioning cum neutralizing process:-

De-gumming: De-gumming is the process of removal of phosphatides and other limy or mucilaginous material. The process consists of hydrating the gums by subsequent removal by centrifugal separation. The oil so obtained is then sent for neutralization.

Bleaching: The oil, after initial purification, is bleached by contact with activated earth and charcoal to improve the colour of the oil to acceptable levels. The process also removes any soap traces left in the oil after water washing any other metallic compounds present in the oil. The process consists of mixing the oil with adequate quantities of bleaching earth, heating it for a specified time temperature cycle followed by removal of bleaching earth from the oil by a filtration process.

Deodorizing: The bleached oil still needs deodorizing to remove impurities, which impart objectionable odours or flavors to the oil. The oil is subjected to high temperature and high vacuum conditions. The oil is cooled, mixed with antioxidants and filtered. The final product is sold in the markets as refined vegetable oil.

Manufacturing Process of Vanaspati:

In this process the phase of oil changes by adding hydrogenation at double bond of carbon chain. The main processes involved in manufacturing of Vanaspati are as follows:

Hydrogenation process: Hydrogenation is an operation involving the direct addition of hydrogen at the double bonds of the fatty acid chain that enters in the composition of the triglycerides of the oil. It means converting liquid oils to semisolid, plastic fats suitable for shortening or margarine manufacture. The purpose is to adjust the consistency of the oil. The hydrogenation process is performed by batch.

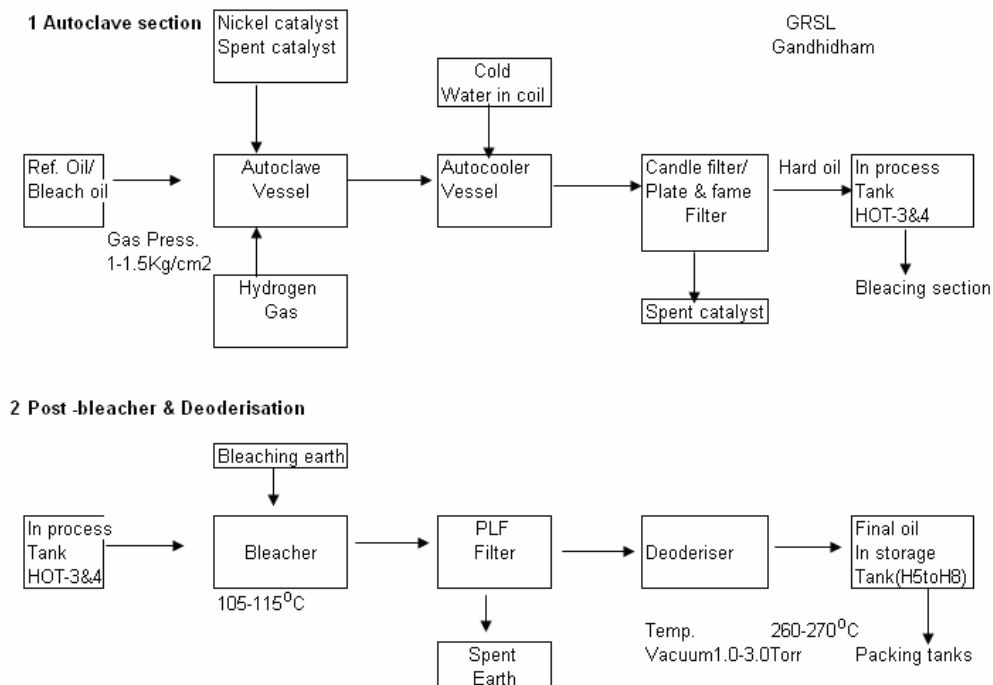

The steps are:

- Heating the incoming oil by exchange with the out coming hydrogenated oil.
- Final heating of the incoming oil by HP Steam to the required temperature.
- Hydrogenating the batch in the reactor. After the Ni-catalyst is mixed the hydrogen is introduced in the oil and dispersed by the agitator blades.
- Drain of the reactor to the drop tank.
- Cooling by means of the heat exchange with the incoming oil.
- Filtration of the oil to remove the catalyst.

Bleaching Process: Filtered oil from autoclave is feed in post bleacher, this oil is bleach with bleaching earth .The temperature of bleacher keep in between 100-110°C; the bleaching is done under vacuum of 26" Hg. Bleaching time remains 30 minutes. This bleach oil is filtered through PLF & send for deodorization.

Deodorization Process: Some smell is developed during hydrogenation & bleaching process, this smell is removed in deodorization process. In Deo., oil is deodorized under high vacuum of 2-5 Torr. Temperature of deo keep 225-250°C. The odiferous compounds basically are aldehyde, Ketones, alcohols etc. these compounds are volatile in nature, on high temperature & under vacuum these compound distilled out. After deodorization oil goes to storage tank & from storage tank to blending tank where Vitamin & til oil are mixed. Now the blend is ready for packing. After blending this Vanaspati is pack in different pack size, packed material send to cold room where this packed material is kept under low temperature. Vanaspati from cold room is send to the dispatch Godown. Vanaspati is dispatched from the Godown.

Vanaspati Processing

Proposed Soyabean unit

The Soyabeans are checked for quality and are cleaned to remove impurities like broken seeds, husks, stone particles etc. through pre-cleaner and destoner thereafter it will further fed to the crusher to make small pieces. There are several steps in the seed-crushing process: **Dehulling:** First, Soyabeans seeds are cracked and the hull is removed. **Soaking:** Seeds are then fed to the cooker to make hot with help of 100 centigrade. Soyabeans then are flaked in special machines, flaker and moved to towers or tanks where they are soaked in a chemical solution. **Steam:** This entire is one sort of preparatory and output of the same can be feed to extractor. Soyabeans then are processed to extract the oil and meal. In extractor flakes will be sprayed through food grade Hexane and so on will extract the oil content (18 to 20%) out of the flakes. From 1 MT of Soyabean, the process produces 18% of oil and 80% of meal. This solvent removes about 99 percent of the pure, crude oil from the flakes. **Refining:** The crude oil may be refined further depending on how it is to be used. In the refining process, crude oil can be water degummed to separate the hydratable & non-hydratable **Gums:** This degummed oil is then bleached, deodorized or hydrogenated with hydrogen gas, neutralized. In "Neutralized" the fatty acid content of the oil is neutralized with a caustic acid to produce some products (like soap). The oil also may be "bleached" by treating it with an absorbent clay material before it is "deodorized" through a vacuum steam-distribution process.

Toasting and Grinding: After the oil is removed, the flakes then is cleaned, toasted and ground to improve its nutritional value. This mixer will be fed further to Desolventiser Toaster to evaporate hexane particles and oil particles. Out put of the Toaster section at bottom is De Oil Cake and will be fed to Distillation and recuperation section to depart oil and hexane. This recovered hexane will be reused in the process. The meal, so produces consists 48 percent protein.

Castor oil

Company is also in castor oil business, we have taken on hire one castor oil plant from Rajena Agro Industries for production of Castor oil BSS.

The process of Castor oil is as follows:

B.S.S. Grade Castor Oil:

When Castor Seeds are traditionally crushed in traditional type expeller where the Castor seed after cleaning fed to cooking chamber where the seeds are heated with direct as well as indirect steam and then to screw type expeller, the commercial oil comes out, Due to high pressure and heat little dark color oil is obtained. Oil obtained is also having some gums and water. The crude oil so obtained is collected in under ground tank, and then transferred to the de-gumming / de-sliming vessel traditionally called neutralizer, where the oil is heated to 110 C so all the foots and fragments are separated and settled. The so obtained oil is called commercial Castor oil. The commercial Castor oil is then charged to Bleacher for further purification and is purified by adding Bleaching Earth and activated carbon under vacuum and heat; once the process is complete the oil is filtered with help of pressure leaf filter to remove carbon and Bleaching Earth added. The filtered oil is light in color and called B.S.S. Grade Castor Oil.

Manufacturing Process of Tin for Packaging:

Tin plate shear in shearing machine as per the size required for body cylinder and for top bottom of the can. Sheets sheared in the shearing machine are taken to roll forming machine for rolling of sheets to make them suitable for side seam welding. Sheet rolls are welded in side welding machine and send to Starch former where they are it stretched and made square and then send to flanging machine to flange the square body of the can.

During this top and bottom of the can is made in the power press and top of the tin send to the projection welding machine where handle is welded to it with chapdi. This top bottom and flanged body are send to the seaming machine to seam the top bottom with body after seaming soldering is carried out at top and bottom of the tin to make it leak proof. After soldering tin is ready for different type of tests such as

Pressure Test: The Tin is tested by the air pressure gauge with requisite pressure. **Hydraulic Pressure Test:** The Tin is tested by the hydraulic pressure with requisite pressure. **Handle Pull Test:** The Handle of Tin is tested by handle pull test machine by applying 40 Kgs. If the above tests are found O.K., then these Tins are cleaned and coated with laker to prevent from weather effects.

XI Export Possibilities and Export Obligations

In the Solvent Extraction process we have a by-product (De-Oiled Cake) from the different oils which we produce and process, viz. Mustard, Soyabean, Groundnut, Cotton, etc. We export these by-products, of consistent quality, in bulk quantities, which helps us earn better realizations on our by-products as we save on the logistics cost. Other players with smaller capacities cannot export, as their by-products are in smaller quantity and it is not economically viable to export such small quantities, we also purchase these small quantities from units with small capacities and export. Hence our Company becomes a one point solution supplier for the importers of De-Oiled Cake. This also indirectly allows us to hedge the exchange fluctuation risk related to import of crude oil.

We have increased our export sales from 889.22 Lacs in FY 2006 to 13644.35 Lacs in FY 2007, this has helped us to improve our margins and to diversify our risks, other than offering natural hedge against foreign exchange fluctuations.

We may be required to pay an estimated amount of Rs. 153.37 Lacs to the Government of India if we do not meet our export obligations pursuant to the Government of India's Export Promotion Capital Goods Scheme this might have an effect on our results of operations.

There is a good demand for De-oiled Cake & Castor Oil in the foreign countries and our Company has been consistently making efforts to increase export sales. Our export obligations outstanding as on November 30, 2007 is Rs. 4477.31 lacs.

The Company's sales increased from 125004.30 Lacs in 2005-06 to Rs. 156249.10 Lacs in F.Y. 2006-07 (an increase of about 25%).

In line with the company's objects of increasing retail presence, the company has to keep stock of finished goods at various locations to ensure continuous availability of its products. Hence there was an increase in inventory holding level from ~1 month in F.Y. 2005-06 to ~1.25 months in F.Y. 2006-07. This is further evidenced by the increase in retail sales from around 18% of the total sales for the F.Y. 2005-06 to around 30% of the total sales for the F.Y. 2006-07

The stock of finished goods & WIP and other stock increased from Rs. 5646 Lacs as on March 31, 2006 to Rs. 8758 Lacs as on March 31, 2007 (An increase of Rs. 3112 Lacs in inventory).

During the F.Y. 2006-07, the Company had increased its seed processing capacity from 60,000 MT to 1,20,000 MT per annum and solvent extraction capacity from 90,000 MT to 1,80,000 MT per annum. Hence, stock of seed increased from 1070 Lacs to 3150 Lacs in 2007 (net increase of 2080 Lacs in inventory).

The Company also started Castor Oil business in the F.Y. 2006-07. The stock of castor related products was NIL as on March 31, 2006 and Rs. 756 Lacs as on March 31, 2007. Hence a net increase of Rs. 756 Lacs in inventory.

The Company acquired a 100 TPD refinery at Surat during this period. It procured raw material in the month of March 2007 for this new unit. The production started in April 2007. Hence, as on March 31, 2007 the stock of this unit amounting to Rs. 499 Lacs also added to the increased stock levels.

The Company also increased its focus on export. During 2006-07, its exports amounted to Rs. 13644.3 Lacs as compared to Rs. 889.22 Lacs in 2005-06, showing an increase of Rs. 12755.13 Lacs. In case of export the stocking period is higher because the company has to store the material in bulk at port. Hence average stocking period is about 2 months stock.

The total increase as a result of all the above factors amounted to Rs. 6447 Lacs. A summary of all the factors is shown in the table below:

Summary	Amount (Rs. In Lacs)
Inventory as on March 31, 2007	16366.80

QIBs should note that they may be required to pay additional amounts, if any, by the Pay-in Date specified in the revised CAN, for any increased allocation of Equity Shares. OTHER INSTRUCTIONS

Joint Bids in the case of Individuals

Bids may be made in single or joint names (not more than three). In the case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid-cum-Application Form or Revision Form ("First Bidder"). All communications will be addressed to the First Bidder and will be dispatched to his or her address, as per the Demographic Details received from the Depository.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or first Bidder is one and the same. Bids/ Application by eligible employees can be made also in the "Net Issue to the Public" and such bids shall not be treated as multiple bids. In this regard, illustrations of certain procedures which may be followed by the Registrar to the Issue to detect multiple applications are provided below:

1. All applications with the same name and age will be accumulated and taken to a separate process file as probable multiple master.
2. In this master, a check will be carried out for the same PAN. In cases where the Permanent Account Numbers are different, the same will be deleted from this master.
3. The Registrar will obtain, from the depositories, details of the applicant's address based on the DP ID and Beneficiary Account Number provided in the Bid-cum-Application Form and create an address master.
4. Then the addresses of all these applications from the address master will be strung. This involves putting the addresses in a single line after deleting non-alpha and non-numeric characters i.e. commas, full stops, hash etc. Sometimes, the name, the first line of address and pin code will be converted into a string for each application received and a photo match will be carried out amongst all the applications processed. A print-out of the addresses will be taken to check for common names.
5. The applications will be scanned for similar DP ID and Client ID numbers. In case applications bear the same numbers, these will be treated as multiple applications.

6. After consolidation of all the masters as described above, a print out of the same will be taken and the applications physically verified to tally signatures as also fathers/husbands names. On completion of this, the applications will be identified as multiple applications.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the mutual fund registered with SEBI and such Bids in respect of more than one scheme of the Mutual Fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made.

We reserve the right to reject, in our absolute discretion, all or any multiple Bids in any or all categories.

Permanent Account Number (PAN)

Bidders or, in the case of a Bid in joint names, each of the Bidders, should mention his/her PAN allotted under the I.T. Each of the bidders should hold a valid Permanent Account Number allotted under the IT Act and mention his/her Permanent Account Number in the application form while bidding for this issue.. **It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN as the Bid is liable to be rejected on this ground.** In case the sole/First Bidder and Joint Bidder(s) is/are not required to obtain PAN, each of the Bidder(s) shall mention "Not Applicable" and in the event that the sole Bidder and/or the joint Bidder(s) have applied for PAN which has not yet been allotted each of the Bidder(s) should Mention "Applied for" in the Bid cum Application Form. Further, where the Bidder(s) has mentioned "Applied for" or "Not Applicable", the sole/First Bidder and each of the Joint Bidder(s), as the case may be, would be required to submit Form 60 (Form of declaration to be filed by a person who does not have a PAN and who enters into any transaction specified in rule 114B), or, Form 61 (form of declaration to be filed by a person who has agricultural income and is not in receipt of any other income chargeable to income tax in respect of transactions specified in rule 114B), as may be applicable, duly filled along with a copy of any one of the following documents in support of the address: (a) Ration Card (b) Passport (c) Driving License (d) Identity Card issued by any institution (e) Copy of the electricity bill or telephone bill showing residential address (f) Any document or communication issued by any authority of the Central Government, State Government or local bodies showing residential address (g) Any other documentary evidence in support of address given in the declaration. It may be noted that Form 60 and Form 61 have been amended vide a notification issued on December 1, 2004 by the Ministry of Finance, Department of Revenue, Central Board of Direct Taxes. All Bidders are requested to furnish, where applicable, the revised Form 60 or Form 61, as the case may be.

Unique Identification Number ("UIN")

SEBI has, with effect from July 2, 2007 declared that the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of transaction. Thus the use of UIN has been discontinued.

- c) Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio in that category subject to minimum allotment of 35 Equity Shares. The minimum allotment lot shall be the same as the minimum application lot irrespective of any revisions to the Price Band.
- d) In case the proportionate allotment to any Bidders is in fractions, then the same would be rounded off to nearest integer.

 - Each successful Bidder shall be allotted a minimum of 35 Equity Shares; and
 - The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares calculated in accordance with (c) above.
- f) If the proportionate allotment to a Bidder is a number that is more than 35 but is not a multiple of 35 (which is the marketable lot), the number in excess of the multiple of 35 would be rounded off to the higher multiple of 35 if that number is 35 or higher. If the number is lower than 35, it would be rounded off to the lower multiple of 35. All Bidders in such categories would be allotted Equity Shares arrived at after such rounding off.
- g) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for allotment shall be first adjusted against any other category, where the allotted Equity Shares are not sufficient for proportionate allotment to the successful bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising of bidders applying for minimum number of Equity Shares.

Restrictions on Foreign Ownership of Indian Securities

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of Government of India, and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. As per current foreign investment policies, foreign investment in the edible oil manufacturing sector is permitted up to 100% under the automatic route. Further, foreign investment in wholesale trading as undertaken by the Company is also permitted up to 100%.

By way of Circular No. 53 dated December 17, 2003, the RBI has permitted FIIs to subscribe to shares of an Indian company in a public issue without prior RBI approval, so long as the price of Equity Shares to be issued is not less than the price at which Equity Shares are issued to residents. In our Company, as on date aggregate FII holding can be upto 100% of the total Issued Share Capital.

Transfers of equity shares previously required the prior approval of the FIPB. However, vide a RBI circular dated October 4, 2004 issued by the RBI, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (FDI) Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997 (ii) the non-resident shareholding is within the sectoral limits under the FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Representation from the Bidders

No person shall make a Bid in Issue, unless such person is eligible to acquire Equity Shares of the Issuer in accordance with applicable laws, rules, regulations, guidelines and approvals.

The Issuer, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of the Issuer.

There is no reservation for Non Residents, NRIs, FIIs, foreign venture capital funds, multi-lateral and bilateral development financial institutions and any other foreign investor. All Non Residents, NRIs, FIIs and foreign venture capital funds, multi-lateral and bilateral development financial institutions and any other foreign investor applicants will be treated on the same basis with other categories for the purpose of allocation.

Accordingly, the Equity Shares are only being offered and sold (i) in the United States to "qualified institutional buyers", as defined in Rule 144A of the Securities Act in reliance on Rule 144A under the Securities Act, and (ii) outside the United States to certain persons in offshore transactions in compliance with Regulation S under the Securities Act.
